

LTM4675, LTM4676A  
LTM4677, LTM4620A  
PSM μModule Power Stick

## DESCRIPTION

Demonstration circuit 2204A is a very compact demo board that showcases five different Linear Technology devices – [LTM4675](#), [LTM4676A](#), [LTM4677](#), [LTM4620A](#) and [LTC2974](#). These devices cover various product lines including DC/DC μModule® regulator with digital power system management (LTM4675, LTM4676A and LTM4677), high current analog DC/DC μModule regulator (LTM4620A) and I<sup>2</sup>C/SMBus/PMBus power system managers with EEPROM (LTC2974). Please see data sheets for more detailed information.

DC2204A contains seven different rails, including six single-phase rails and one dual-phase single-output rail from LTM4677. The μModule regulators used on this board only require only a few external components and therefore can greatly save the footprint, reduce the design effort and improve the system reliability. The LTC2974 monitors LTM4620A's output voltage, load current and temperature through external diodes.

DC2204A powers up to default settings and produce power based on configuration resistors without the need for any serial bus communication. This allows easy evaluation of

the DC/DC μModule regulators. There is also a connector to wall adapter which allows easy demonstration without DC/DC power supply. Multiple DC2204A boards can be cascaded together to form a high channel count power supply.

To fully explore the extensive power system management features of the part, download the GUI software LTpowerPlay™ onto your PC and use LTC's I<sup>2</sup>C/SMBus/PMBus dongle DC1613A to connect to the board. LTpowerPlay allows the user to reconfigure the part on the fly and store the configuration in EEPROM, view telemetry of voltage, current, temperature and fault status.

## GUI Download

The software can be downloaded from:  
<http://www.linear.com/ltpowerplay>

Design files for this circuit board are available at  
<http://www.linear.com/demo/DC2204A>

## PERFORMANCE SUMMARY

Specifications are at  $T_A = 25^\circ\text{C}$

PARAMETER	μMODULE PART NUMBER	CONDITION	UNITS
Input Voltage Range			4.5V to 15V
Output Voltage, $V_{00}$	LTM4675	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $I_{00} = 0\text{A to } 9\text{A}$	0.5V to 3.5V*, Default: 0.9V
Maximum Output Current, $I_{00}$	LTM4675	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $V_{00} = 0.5\text{V to } 5.5\text{V}$	9A**
Output Voltage, $V_{01}$	LTM4675	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $I_{01} = 0\text{A to } 9\text{A}$	0.5V to 3.5V*, Default: 0.7V
Maximum Output Current, $I_{01}$	LTM4675	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $V_{01} = 0.5\text{V to } 5.5\text{V}$	9A**
Output Voltage, $V_{02}$	LTM4676A	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $I_{02} = 0\text{A to } 13\text{A}$	0.5V to 3.5V*, Default: 1.5V
Maximum Output Current, $I_{02}$	LTM4676A	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $V_{02} = 0.5\text{V to } 5.5\text{V}$	13A**
Output Voltage, $V_{03}$	LTM4676A	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $I_{03} = 0\text{A to } 13\text{A}$	0.5V to 3.5V*, Default: 1.2V
Maximum Output Current, $I_{03}$	LTM4676A	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $V_{03} = 0.5\text{V to } 5.5\text{V}$	13A**
Output Voltage, $V_{04}$	LTM4677	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $I_{04} = 0\text{A to } 36\text{A}$	0.5V to 1.8V, Default: 1V
Maximum Output Current, $I_{04}$	LTM4677	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $V_{04} = 0.5\text{V to } 1.8\text{V}$	36A**
Output Voltage, $V_{05}$	LTM4620A	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $I_{05} = 0\text{A to } 13\text{A}$	0.6V to 3.5V*, Default: 0.95V
Maximum Output Current, $I_{05}$	LTM4620A	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $V_{05} = 0.6\text{V to } 5.3\text{V}$	13A**
Output Voltage, $V_{06}$	LTM4620A	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $I_{06} = 0\text{A to } 13\text{A}$	0.6V to 3.5V*, Default: 0.85V
Maximum Output Current, $I_{06}$	LTM4620A	$V_{IN} = 4.5\text{V to } 15\text{V}$ , $V_{06} = 0.6\text{V to } 5.3\text{V}$	13A**

\*Note: The LTM4675, LTM4676A and LTM4620A can provide outputs up to 5.5V (5.3V for LTM4620A); however 4V-rated output ceramic capacitors are used on board. When running at higher output voltage, 6.3V-rated output capacitors should be used.

\*\*Note: When running at full load, forced air flow is needed.

## QUICK START PROCEDURE

Demonstration circuit 2204A is easy to set up to evaluate the performance of four μModules. The following procedure describes how to set up a DC2204A demo system. Please refer to Figure 2 for the test setup and Figure 3 for the DC2204A top side details.

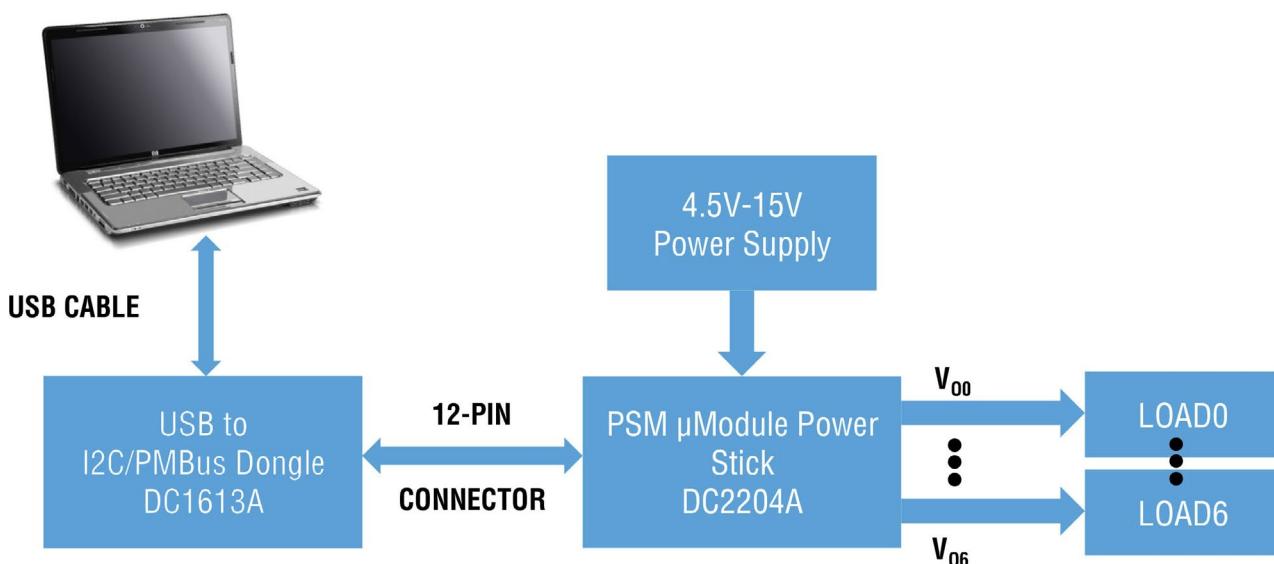

Figure 2. DC2204A Test Setup

dc2204af

## QUICK START PROCEDURE

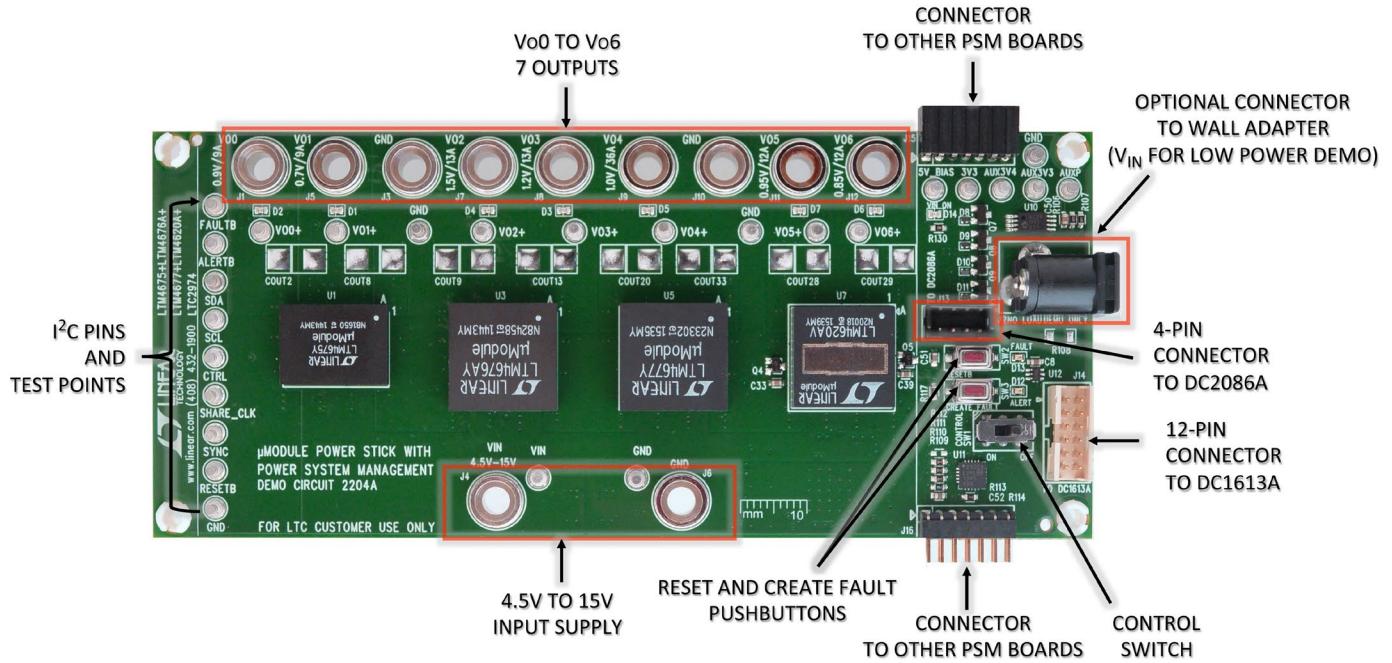

Figure 3. DC2204A Top Side Details

# DEMO MANUAL DC2204A

## QUICK START PROCEDURE

1. Download and install the LTpowerPlay GUI;
2. Connect the DC1613A dongle to the DC2204A using the 12-pin ribbon cable;
3. With power off, connect the input power supply (4.5V to 15V) to  $V_{IN}$  and GND;
4. Launch the LTpowerPlay GUI (the LTpowerPlay Main Interface is shown in Figure 4):

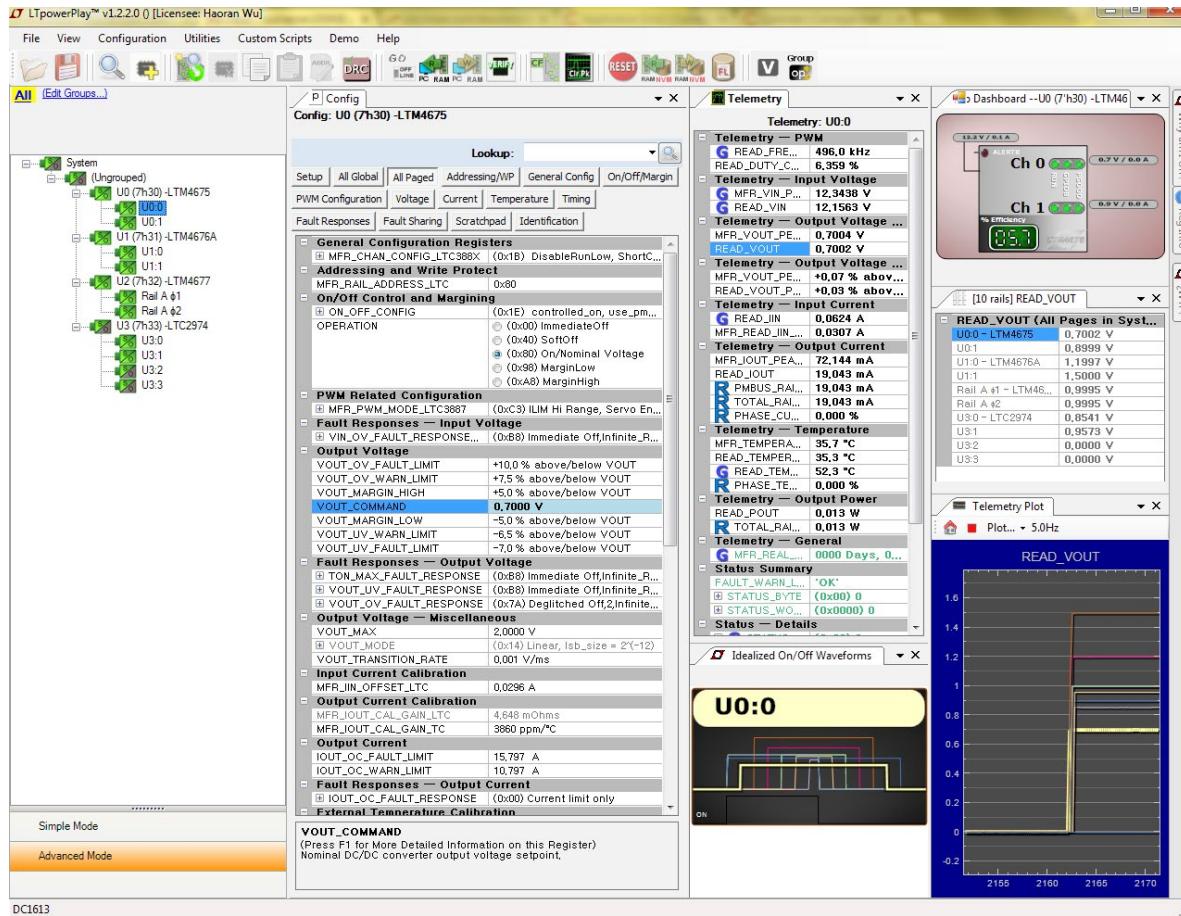

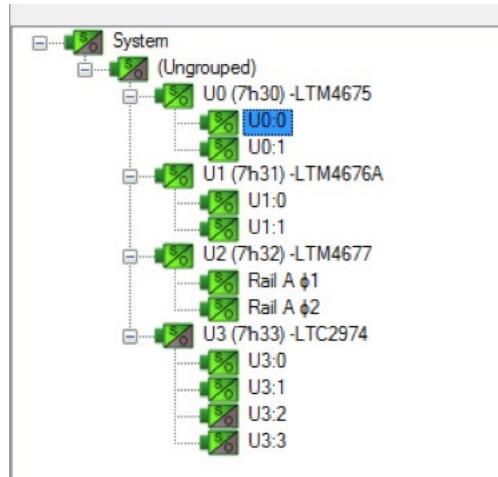

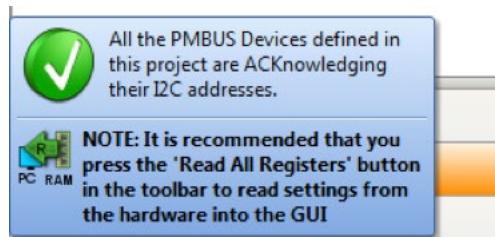

Figure 4. LTpowerPlay Main Interface

## QUICK START PROCEDURE

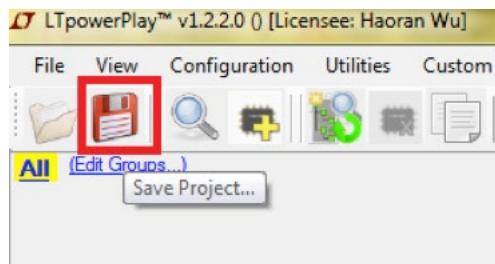

- a. The GUI will automatically identify the DC2204A and build a system tree for each PSM µModules and manager. The system tree on the left hand side will look as below:

- b. A green message box will be displayed momentarily in the lower left hand corner confirming that the DC2204A is communicating.

- c. Save the demo board configuration to a (\*.proj) file by clicking the Save icon. This creates a backup file.

5. The CONTROL switch is configured to control all seven rails. Slide the switch to ON to enable, OFF to disable all rails.

# DEMO MANUAL DC2204A

---

## COMMON DEMO BOARD OPERATIONS

### DC2204A On-Board LEDs

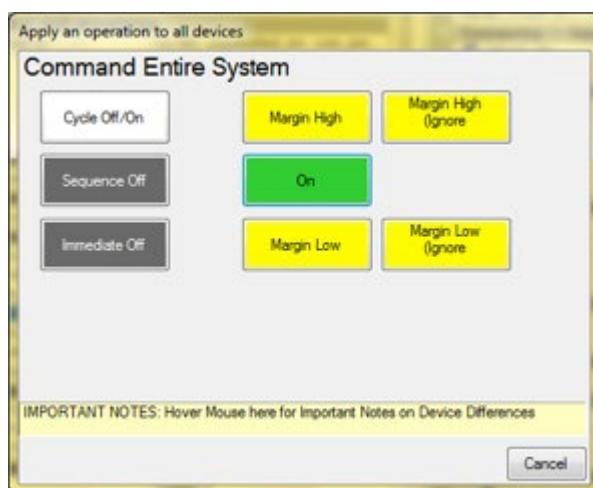

Each individual rail on DC2204A has its own green power-good LED indicator (D1 through D7). There is another green LED (D12) which is on after  $V_{IN}$  supply is applied. Two red LEDs (D12 and D13) will illuminate when an alert or a fault has occurred.

### Margin All Rails

The digital power products on the DC2204A not only monitor each of their respective outputs but can margin the outputs either high or low. Margining is the operation that moves a rail either up or down for testing purposes. It allows a system to be fully characterized over supply limits without the use of external hardware or resources. The GUI provides an easy way to margin all rails high or all low by clicking one of four buttons. To invoke the margining dialog, click the GroupOp icon in the toolbar.

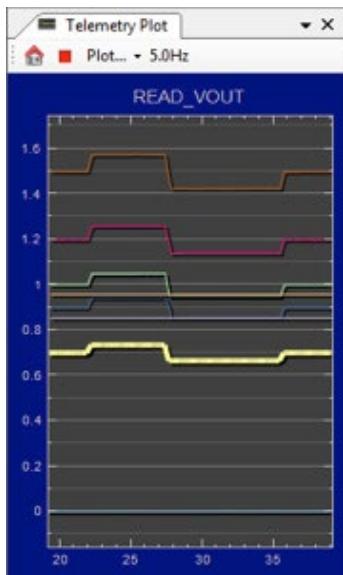

Then the user can choose Margin High, Margin Low or some other operations to all the devices from the window in below.

## COMMON DEMO BOARD OPERATIONS

The telemetry window in the lower right hand corner shows the effect of the margin high or margin low operation. The following screen shot shows all rails going from nominal set points to margin high, margin low and back to nominal voltages.

### Creating and Clearing a Fault

There is a pushbutton on the DC2204A board which is used to force a fault and demonstrate the demo board's ability to detect it and respond according to the configuration.

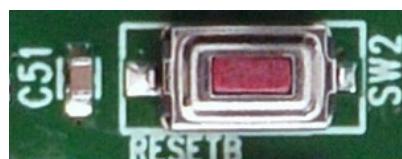

When pressing this button (SW3), it creates a VOUT\_UV fault on Vo6, by pulling COMP pin low externally. The user should see Vo6 output power off, the green LED (D6) off and the red LED (D12) on. After a retry period, the rail will be back on.

To clear a fault, the user may click the CF icon in the GUI or simply push the RESET pushbutton on the demo board. In both cases, the red (+) on the CF icon and alert LED on the board will be cleared. The user will notice that all rails are automatically re-enabled after a programmable retry period.

### Reset the DC2204A

A reset pushbutton is provided on the board. To reset all devices on the DC2204A board and reload the EEPROM contents into operating memory (RAM), press RESETB (SW2) on the DC2204A.

## DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.**

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No license is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

**Please read the DEMO BOARD manual prior to handling the product.** Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.
